1. How to start

After booting, Emergency Boot Kit displays its main menu.

To start Windows Password Wizard, press the **F2** key or click mouse on *windows password wizard* line.

2. About Windows Password Wizard

All wizards share the same user interface design principles:

1. To open next wizard page, click *Next>* button.
2. To return to previous wizard page, click *<Back* button.
3. To cancel (exit wizard without applying changes), click *Cancel* button.

3. Windows Password Wizard pages

3.1. Loading Page

Just after starting the wizard you should see message like one shown on the screenshot. It will automatically disappear after a few seconds.

3.2. OS Selection Page

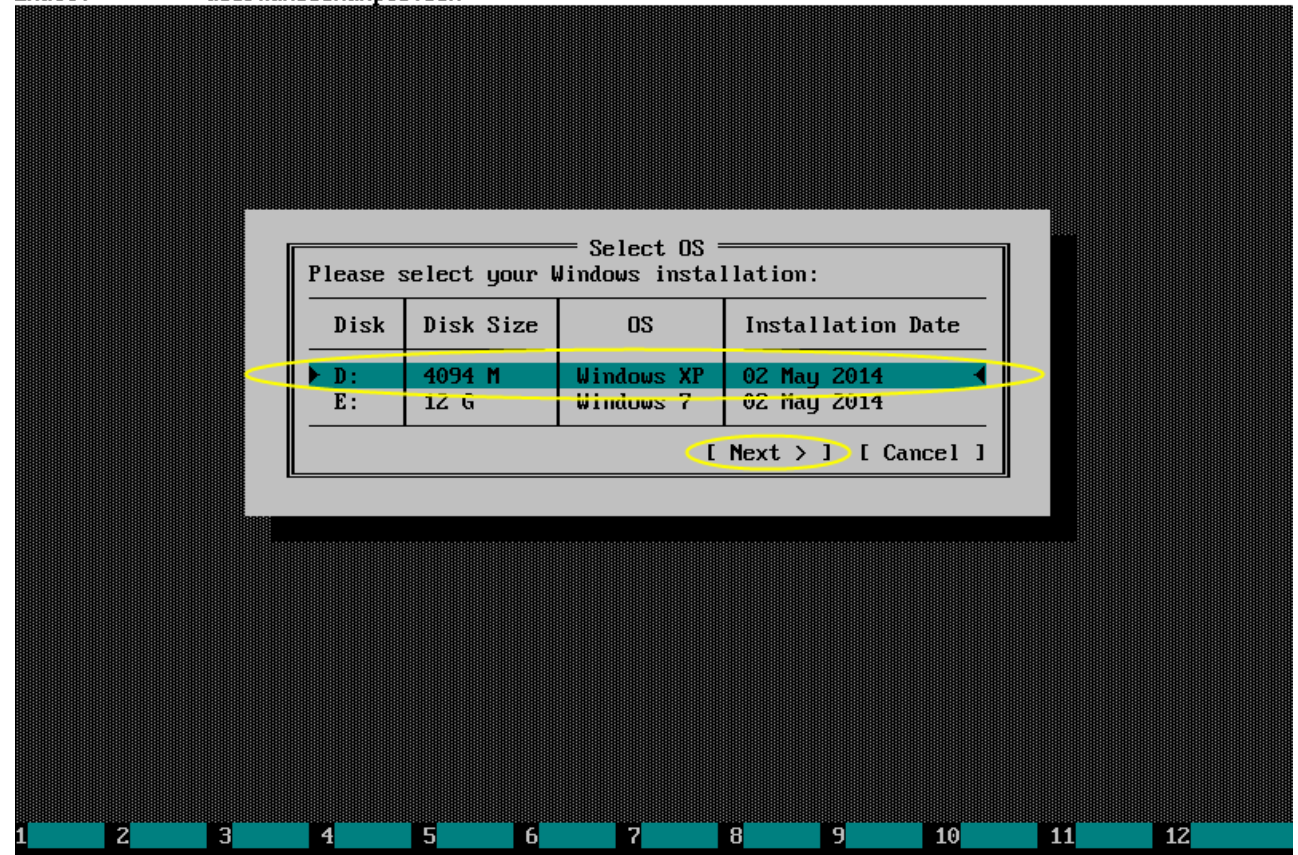

If your PC has multiple Windows installations, then a list of all Windows installations will be displayed.

Please select Windows installation you are going to change password for, using ↑ and ↓ keys, and click the *Next>* button.

If there is only one Windows installation on your PC, then this wizard page is not displayed (EmBootKit Windows Password Wizard automatically skips it to the next page).

3.3. User Account Selection Page

This page displays the list of user accounts. For each user account Emergency Boot Kit displays its status: locked or unlocked.

Select user account to change password for (and also optionally unlock) using ↑ and ↓ keys, and click *Next*> button.

3.4. New Password Page

This wizard page is to enter a new password for chosen user account. You may also check target user name and Windows installation here.

You may set blank password as well.

If user account is locked, this page also displays check box labeled "*Also unlock this account*", checked by default. If you leave it checked, then account will be unlocked. To leave account as is (locked), uncheck the check box by clicking it.

Click *Next>* button to continue.

3.5. Final Page

This page shows message about either successful password change (in a window with grey background) or some error occurred during this operation (in a window with red background).

To exit EmBootKit Windows Password Wizard, press **Enter** or click the *Finish* button.
